

ANADACH GROUP

ANALYZE | ADVISE | ACHIEVE

Dear Friends and Colleagues,

The first quarter of 2022 has been an extremely busy season for Anadach - working with old and new clients in several countries and continents. We have been lucky enough to collaborate with various partners including several multi-national companies, during the most serious pandemic in recent history, and this has allowed us to observe and identify new trends during an extraordinary disruption of the healthcare space and economies in many countries. Additionally, Anadach in conjunction with our partners, has been able to contribute innovative ideas and solutions, as we all work together on ending this pandemic.

Given the increased focus on healthcare, and consequent increased public and private sector financing, do feel free to reach out to discuss innovative options or approaches to improving access to quality healthcare through interventions across the health value chain including pharmaceuticals, technology, financing and delivery.

Our busy schedule has continued well into the second quarter of 2022, and the rest of the year promises to be just as busy. As usual, we will be co-hosting several events with different partners. We are hosting/partner on these events as we believe it is an excellent way to network with industry peers, develop new relationships and collaborate on common goals as we move to a world where COVID is under control throughout the globe. We look forward to seeing you!

Best,
The Anadach Team

GOVERNANCE ACROSS THE AFRICAN PHARMACEUTICAL VALUE CHAIN

June 9th 1.00 pm UTC/GMT, 2.00 pm West African Central Time,
3.00 pm Central African Time and 4.00 pm East African Time

Webinar - Governance Across the African Pharmaceutical Value Chain

June 9th 1.00 pm UTC/GMT, 2.00 pm West African Central Time, 3.00 pm Central African Time and 4.00 pm East African Time

Across the globe, supply chains for health products are complex everywhere. Strong supply chains are essential for effective health care delivery and form the backbone of a country's health system.

The COVID-19 pandemic exposed many countries lacking local capabilities and capacity to manufacture and supply the needed personal protective equipment (PPEs) as well as other essential drugs needed by healthcare workers and the general population to curb the effect of the pandemic. Most countries relied heavily on pharmaceutical and medicine imports due to the lack of local production capacities, policies favoring importation, high cost of importing raw materials and difficulty achieving economies of scale

Working with partners, the Anadach Group is hosting a webinar to engage key players in Africa to discuss how they can strengthen governance across the healthcare supply chain. These stakeholders will be representative of various geographies, as well as various key components across the pharmaceutical value chain. The discussants at the webinar will be open to all issues of critical concern and poised to address the following questions:

- What are the best practices for managing and sharing information across the supply chain?
- How can technology improve the practices for managing supply chains from manufacturing to patient delivery?
- How can high quality and safe drugs, products and supplies be consistently delivered – irrespective of source?
- How can key stakeholders influence policies and legislation that promote safe pharmaceutical practices in a rapidly growing space?
- How can organizations and companies ensure adequate and appropriate human capacity across the entire pharmaceutical value chain to enhance performance and ethical practices?
- How can boards be more accountable and responsible towards stakeholders and promote sustainable healthcare solutions across the supply chain?
- How can good governance practices be incorporated into systems and processes across the Supply Chain?

Opening Remarks: Mr. Olaf Schmidt , Manager . Health, Education, Tourism, Retail, Property Investments – Africa, International Finance Corporation

Special Guest: HE. Mr. Udom Emmanuel, Governor, Akwa Ibom State, Nigeria

Guest Speaker: Dr. James A. Rice; Ph.D., FACHE, Senior Advisor, Governance and Leadership, Gallagher Human Resources & Compensation Consulting, Minneapolis, US; Advisory Board Member, Anadach Group

Panelists:

Dr. Mustafa Hunter, International expert in governance, private sector engagement and corruption risk management

Mr. Bramuel Mwalo, CEO Xetova

Please register to participate. And do share with relevant colleagues. Thank you.

Simple, accurate messages on COVID-19 will prevent vaccine hesitancy – Experts

Media Coverage on Anadach's Covid-19 Vaccine Hesitancy in Africa Webinar Series

Experts have urged journalists, social media influencers to ensure that accurate messages on COVID vaccine are disseminated to the public to help prevent vaccine hesitancy.

This was stated at the last of a three-part webinar series held on December 9 with the theme 'COVID-19 vaccine hesitancy in Africa: reimagining the role of key messengers in both traditional and social media and the hospitality industry, as well as within the highly impacted hospitality and services'.

The webinar was co-organised by a global healthcare strategic consulting firm, Anadach Group LLC and a healthcare-focused human capacity development firm, RDAssociates Africa to assist the inoculation of the African population.

One of the speakers, Ms Jolene Samuels, a social media influencer and founder of the 'Jabs Raffles' initiative in South Africa said "I initially hesitated to be vaccinated because of the flood of misinformation and disinformation and doubts over the safety of the vaccines and because there was so much misinformation out there, I did not know what to believe...

Accelerating Nigeria's tuberculosis response on stronger private partnerships

Anadach's interview with the BusinessDay newspaper

For some health sector stakeholders, it is increasingly unsettling to watch how poor response to early detection fuels and sustains the rise in cases of tuberculosis, a "residual pandemic" that kills an estimated 440,000 people each year in Africa's most populated country, Nigeria.

The infectious disease that attacks the lungs, leaving affected patients with mainly severe coughs is preventable and curable. But somehow, Nigeria still ranks high eight countries suffering the highest burden of the disease around the world.

It was on the front line of interest from various support groups and organisations, locally and globally, until the coronavirus pandemic back-benched it, reducing the flow of resources for control in some very vulnerable communities.

Anadach, a health consulting firm has stepped forward to fill these gaps, going after the crucial support that Nigeria's private sector world can contribute to ending the scourge of the disease.

The Nigerian private sector is believed to have a proven record of supporting disease control as demonstrated in the fight against polio, malaria, and even during the latest COVID-19 pandemic outbreak, where the private sector alliance made

significant financial contributions.

Anadach's theory is that by increasing organised private sector awareness and engagement in TB control, staff screening and detection by occupational physicians can be encouraged. It could also promote coverage of TB care services under private sector insurance plans or medical financing.

Egbe Osifo-Dawodu, founding partner of the Anadach Group said a business-as-usual approach will not yield any positive result, giving her assessment of Nigeria's TB situation....

COVID-19 VACCINE QUESTIONNAIRE

The rapid development of COVID-19, within a year of the start of the epidemic, has led to, what is likely to become, the largest and fastest vaccination campaign in history. As some African countries have started their own COVID-19 vaccination programs, we would like to hear from you if you are based in any African country! Have you been able to get a COVID-19 vaccine? What has your experience been like? This input could be helpful as countries design or refine their COVID-19 vaccination strategies. All input is anonymous, and individuals cannot be identified.

Anadach Group in partnership with the Institute of Human Virology Nigeria (IHVN) has continued to implement the Private Sector Component of a United States Agency for International Development (USAID) funded Tuberculosis Local Network Organization Network (TB-LON3) Project.

Project Goals

- Mobilize the organized private sector to support early TB detection, prevention and treatment
- Build capacity for staff screening and detection by occupational physicians

Year One Achievements

- Advocacy efforts reached over 2 million people in the formal private sector in the TB-LON3 focal states; (virtual & physical) to over 100+ leaders in Lagos, Abeokuta, Ibadan and Oshogbo who represent at least 100,000 employees, in addition to reaching over 2000+ key leaders through our Quarterly newsletter
- Direct Advocacy to over 90 organized private sector stakeholders, focused on getting companies to widen TB screening beyond food handlers to all employees.
- Companies engaged on the project include: Leadway Assurance and its associated Companies, Unilever Plc, Sterling Bank, GT Bank, Dangote Group, OLAM, Animal Care Services Consult, Lafarge Plc, Nigerian Breweries, International Breweries Plc, Sahara Group, GE, Phillips, Honeywell Flour Mills, IHS Towers, Flutterwave.
- Associations engaged include the Nigerian Employers Consultative Association (NECA), State Chapters of the Manufacturers Association of Nigeria (MAN) and Chambers of Commerce and Industry in Lagos and Ogun State.
- Successfully trained 150 Health and Safety Officers, occupational health physicians and human resources for screening and referral of presumptive TB cases.

If you are interested in the training or would like further information on the project, please contact: Dr. Olubunmi Ogboodu at bogboodu@anadach.com.

Recruitment

Anadach is Recruiting on Behalf of Clients

1. Our client is a leading provider of world-class healthcare services for over 15 years in Lagos. The facility is a growing family practice that places strong emphasis on the delivery of high quality patient-centered family medicine
Positions currently available: [Facility Manager](#)
Job location: Victoria Island, Lagos

2. Our client runs a chain of healthcare facilities that provide optimized and patient-centered healthcare services to patients/clients. They provide top-of-the-line services to all clients at the most affordable rates. As a result of expansion and strategic initiatives aimed at delivering increased value to patients' experience, career opportunities exist for high performing professionals that can contribute to a rapidly growing organization.
Positions currently available: [Medical Officer](#)
Job location: Egbeda, Lagos

3. Our client is a growing hospital system in Warri and Benin that places strong emphasis on the delivery of high-quality patient-centered healthcare.
Positions currently available: [Consultant Orthopaedic Surgeon; Senior registrar in Orthopaedic Surgery](#)
Job location: Benin City, Warri

Interested candidates should send application to <https://www.anadach.com/resume>

Job descriptions are available at <https://www.anadach.com/recruitment-solutions>

PAST EVENTS:

2022 World Tuberculosis Day private sector collaboration workshop took place on Thursday, April 7, 2022.

Dr. Egbe Osifo-Dawodu, the Co-Founder of Anadach group was a panelist.

View the messages from the workshop :

On the 24th of March, **Anadach's Dr. Sonia Osi spoke on the Healthcare panel** at [Children's Investment Fund Foundation \(CIFF\)](#)'s Tech4impact Webinar. CIFF is the 5th largest global development philanthropy, and the largest philanthropy focused on improving children's lives. This year's instalment of CIFF's Tech4impact Webinar event focused on sexual reproductive health, maternal and child health, and the benefits, as well as the unintended consequences of technology to this space; both of which the COVID-19 pandemic highlighted. Extensive work that Anadach has conducted at the intersection of digital health and maternal health was used as case study examples. Also, Dr. Osi spotlighted how technology has been leveraged to improve SRHR outcomes for young girls and women in Africa, especially following health system disruptions caused by the pandemic.
